Safeguarding at GWJS

Our school Designated Safeguarding Leads are:

Mrs Petchey, Mrs Stolworthy, Mrs Greenwood, Miss Whing, Mrs Derer, Miss Alderton and Mrs Burman.

Please speak to one of these members of staff if you are worried or concerned about the safety of a child.

If you have a safeguarding concern about a child out of school hours, the number to ring is:

CADS – Children's Advice and Duty Service – 0344 800 8020

Mrs Derer our school Parent Support Advisor and
Mrs Burman and Miss Alderton our school Pastoral Leads and ELSA trained staff are on our school playground every morning from 8:45am. Mrs Derer our school Parent Support Advisor is on our playground every Monday, Wednesday and Thursday morning from 8:45am.

Mrs Burman, Miss Alderton and Mrs Derer are always happy to talk to you about any worries or concerns relating to your child at home or any further support we may be able to offer or signpost you to.

ONLINE SAFETY

At The National College, our WakeUpWednesday guides empower and equip parents, carers and educators with the confidence and practical skills to be able to have informed and age-appropriate conversations with children about online safety, mental health and wellbeing, and climate change. Formerly delivered by National Online Safety, these guides now address wider topics and themes. For further guides, hints and tips, please visit nationalcollege.com.

What Parents & Educators Need to Know about

ALLERGIES & ANAPHYLAXIS

An allergy is an overreaction of the immune system to a food or substance that's usually harmless. Symptoms can be mild, but for some people they can be very serious. This is known as anaphylaxis.

HOW TO SAY ANAPHYLAXIS: ANA-FIL-AX-IS

ALLERGIES AND ANAPHYLAXIS

- Mild allergy symptoms are treated with antihistamines.
- Anaphylaxis is treated with adrenaline, which is administered via an adrenaline device, injected into the outer upper thigh or using a nasal device.
- Anaphylaxis is a medical emergency and a threat to life.

WHAT ADRENALINE DOES

Adrenaline reduces swelling, opens the patient's airways and raises their blood pressure. Patients must go to hospital for monitoring, as the reaction could return.

ANAPHYLAXIS SYMPTOMS

AIRWAY

Symptoms include swelling in the throat, tongue or upper airways; tightening of the throat; a hoarse voice; and difficulty swallowing.

BREATHING

Symptoms include persistent cough; sudden onset of wheezing; breathing difficulty; and noisy breathing.

CIRCULATION

Symptoms include pale and clammy skin; dizziness; feeling faint; sudden sleepiness; tiredness; confusion; and loss of consciousness.

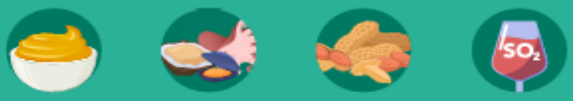

In extreme cases of anaphylaxis, there could be a dramatic fall in the patient's blood pressure. The patient may become weak and floppy, and have a sense of something terrible happening. Any of the ABC symptoms listed above may lead to collapse and unconsciousness and, on rare occasions, be fatal.

TOP 14 FOOD ALLERGENS:

(However, be aware people can be allergic to anything.)

NON-FOOD ALLERGENS:

Meet Our Expert

Anaphylaxis UK is the only UK-wide charity operating solely for the growing numbers of people at risk of serious allergic reactions and anaphylaxis. While there's no treatment or cure for anaphylaxis, we believe that by providing information, training and support, there's a brighter future for people living with serious allergies.
